Wednesday, November 18 - The Role of Enzymes in Autism and Gut Issues

Presenter: Dr. Devin Houston, Ph.D. Biochemist Founder and CEO of Houston Enzymes

Dr. Devin Houston provided the first enzyme product targeted to children with autism in 1999. Since then, he has worked to further the research into enzyme development. Dr. Houston has a distinguished career in academic and industrial enzyme research.

We will answer these questions and more:

How is digestion affected by oral supplementation of enzymes?

When are enzyme products an alternative to some special diets?

How do enzymes address digestive-related issues specific to those on the autism spectrum?

How can you identify differences between enzyme products?

What are the signs that may determine who may benefit from enzyme use?

Location: Rebecca School, 40 East 30 Street, 5th Floor

6:00 pm: Social Hour/Networking

6:30 pm: Lecture
